

LONG-TERM LNG SALE AND PURCHASE AGREEMENT

BETWEEN

QATARGAS OPERATING COMPANY LIMITED

(as Seller)

AND

ENGIE SA

(as Buyer)

COMMODITY: LIQUEFIED NATURAL GAS (LNG)

DELIVERY POINT: FOS CAVAOU LNG TERMINAL, FRANCE

**ANNUAL CONTRACT QUANTITY: 3.0 MILLION TONNES PER
ANNUM (MTPA)**

CONTRACT REFERENCE: QG-ENGIE-LTSA-2024-001

EXECUTION DATE: November 15, 2023

EFFECTIVE DATE: January 1, 2024

TERM: Twenty (20) Years

THIS LONG-TERM LNG SALE AND PURCHASE AGREEMENT (hereinafter referred to as the "Agreement") is entered into on the 15th day of November, 2023 (the "Execution Date"),

BETWEEN:

(1) QATARGAS OPERATING COMPANY LIMITED, a limited liability company established under the laws of the State of Qatar, having its registered office at Qatargas Tower, Al Corniche Street, West Bay, Doha, State of Qatar, P.O. Box 22666 (hereinafter referred to as the "Seller"); and

(2) ENGIE SA, a societe anonyme organized and existing under the laws of the French Republic, having its registered office at 1 Place Samuel de Champlain, 92400 Courbevoie, France, registered with the Trade and Companies Register of Nanterre under number 542 107 651 (hereinafter

referred to as the "Buyer").

The Seller and the Buyer are hereinafter collectively referred to as the "Parties" and individually as a "Party".

RECITALS

WHEREAS, the Seller is the operator of the Qatargas liquefied natural gas production facilities in Ras Laffan Industrial City, State of Qatar, with aggregate liquefaction capacity in excess of 77 million tonnes per annum (mtpa), and is one of the world's largest producers and exporters of LNG;

WHEREAS, QatarEnergy (formerly Qatar Petroleum), the state hydrocarbon company of the State of Qatar, holds an indirect majority interest in the Seller and its upstream gas production assets, including the North Field, which contains the world's largest non-associated natural gas reserves (estimated at approximately 900 trillion cubic feet);

WHEREAS, the Seller is currently expanding its LNG production capacity through the North Field East (NFE) and North Field South (NFS) expansion projects, which will increase Qatar's total LNG production capacity to approximately 126 mtpa by 2028;

WHEREAS, the Buyer is a leading European integrated energy company headquartered in France, engaged in the production, procurement, trading, transportation, distribution, and sale of natural gas and LNG across Europe and globally;

WHEREAS, the Buyer owns and operates LNG receiving and regasification terminal infrastructure in France, including interests in the Fos Cavaou LNG terminal and the Montoir-de-Bretagne LNG terminal;

WHEREAS, the European Union has identified the diversification of natural gas supply sources and the development of LNG import infrastructure as critical objectives for ensuring energy security and reducing dependence on any single supplier, consistent with the EU Energy Security Strategy and the REPowerEU Plan;

WHEREAS, the Parties wish to enter into this long-term Agreement for the sale and purchase of LNG on the terms and conditions set forth herein, reflecting the mutual commercial interests of the Parties and the long-term strategic relationship between the State of Qatar and the French Republic in the energy sector;

NOW, THEREFORE, in consideration of the mutual covenants, representations, warranties, and agreements contained herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows:

ARTICLE 1: DEFINITIONS AND INTERPRETATION

1.1 DEFINITIONS

In this Agreement, unless the context otherwise requires, the following capitalized terms shall have the meanings ascribed to them below:

"ACQ" or "Annual Contract Quantity" means three million (3,000,000) tonnes of LNG per Contract Year, subject to adjustment in accordance with this Agreement.

"Actual Delivery Quantity" means the quantity of LNG (in tonnes) actually delivered by the Seller and received by the Buyer at the Delivery Point during any period.

"Affiliate" means, with respect to any Person, any other Person that directly or indirectly controls, is controlled by, or is under common control with, such Person.

"ADP" or "Annual Delivery Programme" means the schedule of LNG cargo deliveries for a Contract Year, established in accordance with Article 5.

"Applicable Law" means all laws, statutes, regulations, rules, orders, decrees, directives, and requirements of any Governmental Authority applicable to the Parties, the LNG, or the performance of obligations under this Agreement, including the laws of the State of Qatar, the laws of the French Republic, and applicable EU law.

"Berth" means the LNG unloading berth at the Delivery Terminal designated for the receipt of LNG Carriers delivering LNG under this Agreement.

"Boil-Off Gas" or "BOG" means the natural gas generated by the evaporation of LNG during storage, transportation, and unloading operations.

"British Thermal Unit" or "BTU" means the quantity of heat required to raise the temperature of one pound of water by one degree Fahrenheit at or near 39.2 degrees Fahrenheit, at standard atmospheric pressure.

"Business Day" means any day other than a Saturday, Sunday, or a public holiday in both Doha, Qatar and Paris, France.

"Cargo" means a full shipload quantity of LNG loaded onto and transported by an LNG Carrier.

"CIF" means Cost, Insurance, and Freight (Incoterms 2020).

"Contract Price" shall have the meaning set forth in Article 4.1.

"Contract Year" means each period of twelve (12) consecutive calendar months commencing on January 1 and ending on December 31 during the Term. The first Contract Year shall commence on the Effective Date.

"DES" means Delivered Ex-Ship (equivalent to DAP -- Delivered at Place -- under Incoterms 2020, with the delivery point being the flange connection between the LNG Carrier's unloading manifold and the receiving terminal's unloading arm at the Delivery Terminal).

"Delivery Period" means the period, not exceeding seventy-two (72) hours (unless extended by mutual agreement), during which an LNG Carrier is permitted to occupy the Berth at the Delivery Terminal for the purpose of unloading LNG.

"Delivery Point" means the point at which title to and risk in the LNG passes from the Seller to the Buyer, being the flange connection between the LNG Carrier's unloading manifold and the Delivery Terminal's unloading arms at the Fos Cavaou LNG Terminal, Fos-sur-Mer, France.

"Delivery Terminal" means the Fos Cavaou LNG receiving and regasification terminal, located at Port de Fos-sur-Mer, Bouches-du-Rhone, France, owned and operated by Fosmax LNG (a subsidiary of Elengy, itself a subsidiary of the Buyer).

"Diversion" shall have the meaning set forth in Article 6.

"Diversion Cargo" means a Cargo that the Buyer elects to divert to an Alternative Delivery Point in accordance with Article 6.

"DQT" or "Downward Quantity Tolerance" means the quantity of LNG by which the Actual Delivery Quantity in a Contract Year may fall below the ACQ without triggering Take-or-Pay obligations, equal to fifteen percent (15%) of the ACQ (i.e., 450,000 tonnes).

"Effective Date" means January 1, 2024.

"Force Majeure" shall have the meaning set forth in Article 10.

"Governmental Authority" means any government, governmental department, ministry, commission, board, bureau, agency, regulatory authority, court, tribunal, or other instrumentality, whether national, federal, state, emirate, regional, or local.

"Gross Calorific Value" or "GCV" means the quantity of heat (in BTU or MJ) produced by the complete combustion of a unit quantity of gas at standard conditions, with the water formed by combustion being condensed to liquid.

"Henry Hub" or "HH" means the Henry Hub natural gas pricing point located in Erath, Louisiana, United States, as published by the Intercontinental Exchange (ICE) or the New York Mercantile Exchange (NYMEX).

"LNG" means liquefied natural gas, being natural gas that has been cooled to approximately minus one hundred and sixty-two degrees Celsius (-162 degrees C) and converted to liquid form for the purpose of storage, transportation, and delivery.

"LNG Carrier" means an ocean-going vessel designed and constructed for the transportation of LNG in purpose-built membrane or spherical (Moss-type) cargo containment tanks.

"Loading Port" means the LNG loading facilities at Ras Laffan Industrial City, State of Qatar.

"Make-Up" shall have the meaning set forth in Article 3.5.

"MMBtu" means one million British Thermal Units.

"mtpa" means million tonnes per annum.

"Nomination" shall have the meaning set forth in Article 5.

"Off-Specification LNG" means LNG that does not conform to the quality specifications set forth in Article 7.

"Person" means any individual, corporation, company, partnership, limited liability company, joint venture, trust, association, governmental authority, or other entity.

"Platts" means S&P Global Platts (now S&P Global Commodity Insights), or any successor pricing assessment service.

"Quality Specifications" shall have the meaning set forth in Article 7.

"Q-Max Carrier" means a Qatar-Max LNG carrier with a cargo capacity of approximately 266,000 cubic meters (m³), being the largest class of LNG carrier designed for the Qatargas fleet.

"Ras Laffan" means Ras Laffan Industrial City, the site of Qatar's LNG production and export facilities, located in the northeast of the State of Qatar.

"Seller's Facilities" means the LNG liquefaction trains, storage tanks, loading jetties, and all associated infrastructure located at Ras Laffan used by the Seller for the production, storage, and export of LNG.

"Ship-or-Pay" shall have the meaning set forth in Article 3.4.

"SOFR" means the Secured Overnight Financing Rate.

"Take-or-Pay" shall have the meaning set forth in Article 3.3.

"Term" shall have the meaning set forth in Article 2.1.

"Wobbe Index" means the Gross Calorific Value of the gas divided by the square root of its specific gravity (relative density), expressed in MJ/Nm³ or BTU/scf.

1.2 INTERPRETATION

- (a) References to "tonnes" mean metric tonnes (1,000 kilograms).
- (b) References to "Nm³" mean normal cubic meters at 0 degrees Celsius and 101.325 kPa.
- (c) References to "scf" mean standard cubic feet at 60 degrees Fahrenheit and 14.696 psia.
- (d) All monetary amounts are in United States Dollars (USD) unless otherwise specified.
- (e) Headings are for convenience only and shall not affect interpretation.
- (f) The Schedules form an integral part of this Agreement.

ARTICLE 2: TERM

2.1 DURATION

This Agreement shall become effective on the Effective Date (January 1, 2024) and shall remain in full force and effect for a period of twenty (20) Contract Years, expiring on December 31, 2043, unless earlier terminated in accordance with this Agreement (the "Term").

2.2 EXTENSION

The Parties may extend the Term by mutual written agreement. Either Party wishing to extend the Term shall notify the other Party in writing not less than thirty-six (36) months prior to the expiration of the Term. The Parties shall negotiate in good faith the terms and conditions of any extension, including pricing.

2.3 RAMP-UP PERIOD

(a) Contract Year 1 (2024): The ACQ shall be reduced to two million (2,000,000) tonnes to allow for the phasing of supply arrangements and shipping logistics.

(b) Contract Year 2 (2025): The ACQ shall be increased to two million five hundred thousand (2,500,000) tonnes.

(c) Contract Year 3 (2026) and thereafter: The full ACQ of three million (3,000,000) tonnes shall apply.

ARTICLE 3: QUANTITY AND TAKE-OR-PAY

3.1 ANNUAL CONTRACT QUANTITY

(a) Subject to the ramp-up provisions in Article 2.3, the Seller shall make available for delivery, and the Buyer shall take or pay for, three million (3,000,000) tonnes of LNG per Contract Year (the "ACQ").

(b) The ACQ corresponds to approximately fifty-four (54) Cargoes per Contract Year, each Cargo being approximately 55,500 tonnes (loaded on a Q-Max Carrier with a capacity of 266,000 m3 at a nominal LNG density of approximately 450 kg/m3, accounting for heel retention and cargo measurement tolerances).

3.2 QUANTITY TOLERANCES

(a) Upward Quantity Tolerance ("UQT"): The Seller shall have the right (but not the obligation) to deliver up to one hundred and ten percent (110%) of the ACQ in any Contract Year. Additional Cargoes above the ACQ shall be subject to the Buyer's acceptance and berth availability at the Delivery Terminal.

(b) Downward Quantity Tolerance ("DQT"): The minimum quantity that the Buyer must take (or pay for, in the event of failure to take) in each Contract Year shall be eighty-five percent (85%) of the ACQ, equal to two million five hundred and fifty thousand (2,550,000) tonnes (the "Minimum Take-or-Pay Quantity").

3.3 TAKE-OR-PAY OBLIGATION

(a) If the Actual Delivery Quantity received by the Buyer in any Contract Year is less than the Minimum Take-or-Pay Quantity (85% of ACQ), the Buyer shall pay to the Seller, within sixty (60) days after the end of such Contract Year, a take-or-pay payment ("Take-or-Pay Payment") equal to:

Take-or-Pay Payment = (Minimum Take-or-Pay Quantity - Actual Delivery Quantity) x Average Contract Price for such Contract Year

Where "Average Contract Price" means the weighted average price per tonne of LNG delivered during the Contract Year, calculated using the pricing formula in Article 4.1.

(b) The Take-or-Pay obligation shall not apply to shortfalls in delivery caused by:

- (i) Force Majeure affecting the Buyer;
- (ii) the Seller's failure to make LNG available for delivery;
- (iii) Off-Specification LNG rejected by the Buyer in accordance with Article 7;
- (iv) Seller-caused delays at the Loading Port;
- (v) Diversion Cargoes diverted with the Seller's consent (to the extent such diversions are deducted from the ACQ).

3.4 SHIP-OR-PAY OBLIGATION

(a) If the Seller fails to make available for delivery to the Buyer in any

Contract Year a quantity of LNG equal to or greater than eighty-five percent (85%) of the ACQ (the "Minimum Ship-or-Pay Quantity"), the Seller shall pay to the Buyer, within sixty (60) days after the end of such Contract Year, a ship-or-pay payment ("Ship-or-Pay Payment") equal to:

Ship-or-Pay Payment = (Minimum Ship-or-Pay Quantity - Quantity Made Available) x Average Contract Price for such Contract Year

- (b) The Ship-or-Pay obligation shall not apply to shortfalls caused by:
- (i) Force Majeure affecting the Seller;
 - (ii) the Buyer's failure to accept or take delivery of LNG;
 - (iii) closure or unavailability of the Delivery Terminal not caused by the Seller;
 - (iv) Buyer-directed diversions.

3.5 MAKE-UP RIGHTS

(a) In any Contract Year in which the Buyer has made a Take-or-Pay Payment, the Buyer shall have the right, in any subsequent Contract Year during the Term (the "Make-Up Year"), to take delivery of additional LNG (up to the quantity for which Take-or-Pay was paid) at no additional cost (i.e., without paying the Contract Price for such additional LNG), subject to:

- (i) the Buyer's Make-Up right being exercised on a first-in, first-out basis;
- (ii) the Make-Up quantity not exceeding ten percent (10%) of the ACQ in any Make-Up Year (i.e., 300,000 tonnes);
- (iii) the Seller's ability to supply the Make-Up quantity from available production capacity;
- (iv) berth availability at the Delivery Terminal; and
- (v) the Make-Up right being exercised within five (5) Contract Years of the Contract Year in which the Take-or-Pay Payment was made, failing which the Make-Up right shall lapse.

(b) The Buyer shall give the Seller not less than ninety (90) days' advance notice of its intention to exercise Make-Up rights in respect of any Contract Year.

ARTICLE 4: PRICING

4.1 CONTRACT PRICE

The price per MMBtu of LNG delivered at the Delivery Point (the "Contract Price") shall be calculated for each Cargo as follows:

$$\text{Contract Price (USD/MMBtu)} = \text{HH} + \text{S} + \text{F}$$

Where:

HH = the Henry Hub Natural Gas Price, being the arithmetic average of the NYMEX Henry Hub Natural Gas Futures Contract settlement prices for the front-month contract during the Pricing Period;

S = the Fixed Adder, equal to three dollars and fifty cents per MMBtu (USD 3.50/MMBtu), representing the liquefaction tolling fee and margin component;

F = the Shipping Component, being the Platts-assessed freight cost for LNG transportation from Ras Laffan, Qatar to Fos-sur-Mer, France, on a DES basis, for the relevant voyage, as published by S&P Global Commodity Insights (Platts) for the "AG-Mediterranean" route or the nearest comparable route assessment, expressed in USD/MMBtu.

4.2 PRICING PERIOD

The "Pricing Period" for each Cargo shall be the calendar month in which the Bill of Lading Date falls (i.e., the month in which the Cargo is loaded at the Loading Port).

4.3 PRICE CONVERSION

For the purpose of invoicing, the Contract Price (in USD/MMBtu) shall be converted to a price per tonne of LNG using the actual measured Gross Calorific Value of the delivered Cargo:

$$\text{Invoice Amount (USD)} = \text{Contract Price (USD/MMBtu)} \times \text{Total GCV of Cargo (MMBtu)}$$

$$\text{Where Total GCV of Cargo} = \text{Volume of LNG delivered (in Nm}^3\text{)} \times \text{GCV per Nm}^3 \text{ (BTU/Nm}^3\text{)} / 1,000,000$$

4.4 ANNUAL PRICE REVIEW

(a) Commencing from Contract Year 5 (2028), either Party may request a

review of the Fixed Adder (S) component of the Contract Price by giving written notice to the other Party at least twelve (12) months prior to the start of the relevant Contract Year.

(b) The purpose of the price review shall be to ensure that the Fixed Adder remains reflective of prevailing market conditions for long-term LNG supply contracts from the Gulf region to Europe. The Parties shall negotiate in good faith, taking into account:

- (i) the prevailing level of LNG spot and term contract prices;
- (ii) the prices in comparable long-term LNG contracts concluded in the preceding three (3) years;
- (iii) changes in the cost of LNG liquefaction and transportation; and
- (iv) the overall commercial balance of this Agreement.

(c) If the Parties are unable to agree on a revised Fixed Adder within six (6) months of the commencement of negotiations, the matter shall be referred to an independent expert for determination in accordance with Article 13.2. The expert's determination of the Fixed Adder shall be final and binding.

(d) Pending the conclusion of the price review, the existing Contract Price shall continue to apply, and any adjustment shall be retroactively applied from the date the price review was requested, with interest on any retroactive amounts at SOFR.

4.5 INVOICING AND PAYMENT

(a) The Seller shall issue an invoice to the Buyer for each Cargo within ten (10) Business Days after the completion of unloading at the Delivery Terminal.

(b) Each invoice shall specify:

- (i) the Cargo identification number;
- (ii) the name of the LNG Carrier;
- (iii) the Bill of Lading Date and the date of delivery;
- (iv) the volume and mass of LNG delivered (as measured);
- (v) the Gross Calorific Value of the LNG delivered;
- (vi) the total energy content (in MMBtu);
- (vii) the Henry Hub price applicable during the Pricing Period;
- (viii) the Fixed Adder;
- (ix) the Shipping Component;
- (x) the Contract Price (USD/MMBtu);
- (xi) the total invoice amount (USD); and

(xii) bank account details for payment.

(c) Payment shall be due within thirty (30) days of the date of the invoice by wire transfer of immediately available funds in United States Dollars to the Seller's designated bank account.

(d) Late payment shall bear interest at SOFR plus two percent (2%) per annum, calculated on a daily compounding basis from the due date until the date of actual payment.

ARTICLE 5: SCHEDULING AND NOMINATIONS

5.1 ANNUAL DELIVERY PROGRAMME

(a) Not less than ninety (90) days prior to the start of each Contract Year, the Seller shall propose, and the Parties shall agree upon, an Annual Delivery Programme (ADP) setting forth the number of Cargoes, the approximate delivery dates (within a window of plus or minus five (5) days), the LNG Carrier to be used for each delivery, and the estimated volume and quality of each Cargo.

(b) The ADP shall be consistent with the ACQ (or the adjusted ACQ for the ramp-up period) and shall take into account:

- (i) the Seller's production and loading schedules;
- (ii) berth availability at the Delivery Terminal;
- (iii) the Buyer's regasification and send-out requirements;
- (iv) scheduled maintenance at the Seller's Facilities and the Delivery Terminal; and
- (v) LNG Carrier availability and voyage times.

5.2 NINETY-DAY ROLLING SCHEDULE

At least ninety (90) days before the expected delivery date of each Cargo, the Seller shall provide the Buyer with a preliminary Cargo nomination ("90-Day Nomination"), specifying:

- (i) the expected loading date window (5-day window);
- (ii) the expected delivery date window (5-day window);
- (iii) the identity of the LNG Carrier;
- (iv) the estimated volume and quality of the Cargo.

5.3 THIRTY-DAY CONFIRMATION

At least thirty (30) days before the expected delivery date, the Seller shall confirm the Cargo nomination ("30-Day Confirmation"), narrowing the delivery window to plus or minus three (3) days.

5.4 SEVEN-DAY FINAL NOMINATION

At least seven (7) days before the expected delivery date, the Seller shall provide a final nomination ("7-Day Final Nomination"), specifying:

- (i) the confirmed delivery date (plus or minus one (1) day);
- (ii) the confirmed LNG Carrier;
- (iii) the estimated time of arrival (ETA);
- (iv) the estimated volume and quality of the Cargo; and
- (v) any special requirements for unloading.

5.5 SCHEDULE CHANGES

(a) Either Party may request changes to the delivery schedule, subject to reasonable notice and the other Party's acceptance (which shall not be unreasonably withheld).

(b) The Seller shall give the Buyer at least fourteen (14) days' notice of any material change to a Cargo nomination (including a change of LNG Carrier, a delay of more than two (2) days, or a change of more than ten percent (10%) in estimated Cargo volume).

(c) If the Delivery Terminal is unable to receive a Cargo on the nominated delivery date due to berth unavailability, weather restrictions, or terminal outage, the Buyer shall notify the Seller as soon as practicable and the Parties shall cooperate to reschedule the delivery.

ARTICLE 6: DIVERSION RIGHTS

6.1 BUYER'S DIVERSION RIGHT

(a) The Buyer shall have the right to divert up to twenty percent (20%) of the ACQ per Contract Year (i.e., up to 600,000 tonnes, approximately 10-11 Cargoes) to alternative LNG receiving terminals other than the

Delivery Terminal ("Alternative Delivery Points"), subject to the following conditions:

(i) the Buyer shall give the Seller at least thirty (30) days' written notice of its intention to divert a Cargo, specifying the Alternative Delivery Point, the estimated arrival date, and the identity of the receiving terminal;

(ii) the Alternative Delivery Point must be a recognized LNG receiving terminal capable of safely receiving the nominated LNG Carrier, with adequate draft, berth dimensions, and compatible unloading equipment;

(iii) the LNG quality specifications at the Alternative Delivery Point must be compatible with the quality of the LNG being delivered (or the Buyer shall bear the risk and cost of any quality issues);

(iv) the diversion shall not result in any incremental cost or liability to the Seller (any additional shipping costs, port charges, or delays shall be borne by the Buyer);

(v) the diversion shall not violate any Applicable Law, trade sanction, or embargo applicable to the Seller, the LNG Carrier, or the LNG; and

(vi) the Buyer shall not divert any Cargo to a destination or end-user subject to trade sanctions imposed by the State of Qatar, the United Nations, or any jurisdiction to which the Seller is subject.

(b) Title to and risk in a Diversion Cargo shall pass from the Seller to the Buyer at the Delivery Point of the Alternative Delivery Point (the flange connection between the LNG Carrier's manifold and the alternative terminal's unloading arm).

6.2 DIVERSION PROFIT SHARING

(a) If the Buyer diverts a Cargo and resells the LNG at a price exceeding the Contract Price applicable to such Cargo, the Buyer shall share any net profit (after deduction of incremental transportation, port, and transaction costs) with the Seller as follows:

Seller's Share: Fifty percent (50%) of the net diversion profit

Buyer's Share: Fifty percent (50%) of the net diversion profit

(b) The Buyer shall provide the Seller with a statement of diversion

economics within sixty (60) days after completion of the diverted delivery, and any diversion profit-sharing payment shall be due within thirty (30) days thereafter.

6.3 DESTINATION RESTRICTIONS

(a) Notwithstanding the Buyer's diversion rights, the Buyer shall not, without the prior written consent of the Seller, divert or resell any LNG to any country or territory that is subject to comprehensive trade sanctions or embargoes imposed by the State of Qatar or any major international body.

(b) The Buyer shall provide the Seller with destination confirmation for each Diversion Cargo, including the identity of the receiving terminal, the name of the end-buyer (if applicable), and an end-use certificate if requested by the Seller.

ARTICLE 7: LNG QUALITY SPECIFICATIONS

7.1 QUALITY SPECIFICATIONS

The LNG delivered at the Delivery Point shall conform to the following quality specifications (the "Quality Specifications"):

Parameter	Minimum	Maximum	Unit
-----------	---------	---------	------

Gross Calorific Value (GCV)	1,050	1,150	BTU/scf
-----------------------------	-------	-------	---------

Wobbe Index	1,300	1,400	BTU/scf
-------------	-------	-------	---------

Methane (CH ₄)	85.0	--	mol %
----------------------------	------	----	-------

Ethane (C ₂ H ₆)	--	8.0	mol %
---	----	-----	-------

Propane (C ₃ H ₈)	--	3.5	mol %
--	----	-----	-------

Butanes and heavier (C ₄ +) --	2.0	mol %	
---	-----	-------	--

Nitrogen (N ₂)	--	1.0	mol %
----------------------------	----	-----	-------

Carbon Dioxide (CO ₂)	--	50	ppmv
-----------------------------------	----	----	------

Hydrogen Sulfide (H ₂ S)	--	3.3	mg/Nm ³
-------------------------------------	----	-----	--------------------

Total Sulfur	--	30	mg/Nm ³
--------------	----	----	--------------------

Mercury (Hg)	--	0.01	ug/Nm ³
--------------	----	------	--------------------

Carbonyl Sulfide (COS)	--	5	ppmv
------------------------	----	---	------

Water Content	--	0.1	ppmv
---------------	----	-----	------

Temperature at delivery	--	-155	degrees C
-------------------------	----	------	-----------

Free Water and Solids None None --

7.2 MEASUREMENT AND ANALYSIS

(a) The quality of each Cargo shall be determined by analysis of representative LNG samples taken during unloading at the Delivery Terminal using continuous composite sampling methods in accordance with ISO 8943 (Refrigerated Light Hydrocarbon Fluids -- Sampling of Liquefied Natural Gas -- Continuous and Intermittent Methods) or equivalent standard.

(b) The LNG samples shall be analyzed using gas chromatography in accordance with ISO 6974 (Natural Gas -- Determination of Composition and Associated Uncertainty by Gas Chromatography) or GPA 2261 standard.

(c) The Gross Calorific Value shall be calculated from the compositional analysis in accordance with ISO 6976 (Natural Gas -- Calculation of Calorific Values, Density, Relative Density, and Wobbe Indices from Composition).

7.3 OFF-SPECIFICATION LNG

(a) If the Seller tenders LNG that does not conform to the Quality Specifications, the Buyer shall have the following rights:

(i) Accept the Off-Specification LNG at a mutually agreed price adjustment reflecting the quality deviation, provided that the Off-Specification LNG can be safely received, stored, and processed at the Delivery Terminal without adverse effect on terminal equipment or downstream gas quality;

(ii) Reject the Off-Specification LNG, in which case the Seller shall bear all costs and liabilities associated with the rejected Cargo, including demurrage, shipping costs, and the cost of procuring replacement LNG;

(iii) Accept the Off-Specification LNG and blend it with other LNG or gas at the Delivery Terminal to bring the resultant gas within the quality specifications of the French gas grid (operated by GRTgaz), with the cost of blending borne by the Seller.

(b) If the Buyer rejects an Off-Specification Cargo, such rejection shall not count against the Buyer's Take-or-Pay obligation and the Seller shall

remain obligated to deliver a replacement Cargo within a reasonable time.

ARTICLE 8: DELIVERY, TITLE, AND RISK

8.1 DELIVERY BASIS

All deliveries under this Agreement shall be on a DES (Delivered Ex-Ship) basis at the Delivery Point (Fos Cavaou LNG Terminal). The Seller shall be responsible for all costs and risks of transportation of LNG from the Loading Port to the Delivery Point, including:

- (i) LNG Carrier chartering and operating costs;
- (ii) fuel and Boil-Off Gas consumption during the voyage;
- (iii) canal transit fees (including Suez Canal tolls);
- (iv) port charges at the Loading Port;
- (v) marine insurance for the cargo during transit; and
- (vi) all other costs associated with the voyage.

8.2 TITLE AND RISK

(a) Title to and risk in the LNG shall pass from the Seller to the Buyer at the Delivery Point (the flange connection between the LNG Carrier's unloading manifold and the Delivery Terminal's unloading arm) as the LNG passes through such flange connection during unloading.

(b) Upon passage of title, the Buyer shall be responsible for the LNG, including all costs of receiving, storing, regasifying, and distributing the natural gas.

8.3 PORT CHARGES AT DELIVERY TERMINAL

(a) Port charges, pilotage, towage, and berthing fees at the Delivery Terminal (Fos Cavaou) shall be borne by the Buyer.

(b) Demurrage at the Delivery Terminal shall be the responsibility of the Buyer to the extent caused by delays attributable to the Buyer, the Delivery Terminal, or port authorities. Demurrage shall be calculated at the prevailing market rate for Q-Max LNG Carriers or, if no market rate is available, at a rate of USD 150,000 per day.

ARTICLE 9: LNG CARRIERS AND VESSEL SPECIFICATIONS

9.1 VESSEL SPECIFICATIONS

The Seller shall deliver all Cargoes using LNG Carriers that meet the following minimum specifications:

Type: Q-Max LNG Carrier

Cargo Capacity: Approximately 266,000 m3 (liquid volume at -162 degrees C)

Cargo Containment System: Membrane (GTT Mark III Flex or NO 96 GW)

Maximum LOA (Length Overall): 345 meters

Maximum Beam: 55 meters

Maximum Draft (loaded): 12.0 meters

Propulsion: Steam turbine or Dual-Fuel Diesel Electric (DFDE) or

M-type Electronically Controlled Gas Injection (ME-GI)

Flag: Registered under the flag of Qatar (or such other flag as may be approved by the Buyer, not to be unreasonably withheld)

Classification Society: Lloyd's Register, DNV, Bureau Veritas, or American Bureau of Shipping

Age: Not more than twenty (20) years from date of delivery from shipyard

Insurance: Hull and machinery, P&I (Protection and Indemnity), and cargo insurance at commercially reasonable levels with reputable insurers

9.2 VESSEL APPROVAL

(a) The Seller shall provide the Buyer with the identity and specifications of each LNG Carrier to be used for deliveries under this Agreement. The Buyer shall have the right to inspect the vessel documentation and approve (or reject) the vessel, provided that such approval shall not be unreasonably withheld.

(b) Each LNG Carrier shall hold a valid International Ship Security Certificate (ISSC), a valid Safety Management Certificate (SMC), and a valid Document of Compliance (DOC) issued in accordance with the International Ship and Port Facility Security (ISPS) Code and the International Safety Management (ISM) Code.

(c) Each LNG Carrier shall comply with the International Maritime Organization (IMO) regulations, including MARPOL Annex VI (air pollution and greenhouse gas emissions), and the EU Maritime MRV Regulation

(Monitoring, Reporting, and Verification of CO2 emissions).

9.3 BOIL-OFF GAS

(a) The Seller shall be responsible for all Boil-Off Gas generated during the voyage from the Loading Port to the Delivery Point. The Boil-Off Gas may be used as fuel for the LNG Carrier's propulsion system or reliquefied on board, at the Seller's discretion.

(b) The quantity of LNG delivered at the Delivery Point shall be the quantity measured at the Delivery Terminal's custody transfer metering system, and shall reflect the net quantity after deduction of any Boil-Off Gas consumed or vented during the voyage.

ARTICLE 10: FORCE MAJEURE

10.1 DEFINITION

"Force Majeure" means any event or circumstance, or combination thereof, that: (a) is beyond the reasonable control of the Affected Party; (b) could not have been prevented or avoided by the Affected Party through the exercise of reasonable diligence; and (c) directly and materially prevents or delays the Affected Party from performing its obligations under this Agreement.

10.2 FORCE MAJEURE EVENTS

Without limiting the generality of Section 10.1, Force Majeure Events include:

- (a) Natural Events:
 - (i) earthquake, tsunami, volcanic eruption, hurricane, cyclone, or typhoon;
 - (ii) flood, landslide, or subsidence;
 - (iii) epidemic or pandemic;
 - (iv) extreme weather conditions preventing safe navigation or port operations.
- (b) Political and Governmental Events:
 - (i) war (declared or undeclared), invasion, armed conflict, blockade,

or military action;

(ii) revolution, insurrection, civil unrest, terrorism, sabotage, or piracy;

(iii) expropriation, nationalization, or confiscation by any Governmental Authority;

(iv) trade embargo, economic sanctions, or import/export restrictions imposed by the United Nations, European Union, State of Qatar, or the French Republic;

(v) act of any Governmental Authority, including denial, revocation, or non-renewal of any permit, license, or authorization required for performance.

(c) Infrastructure Events:

(i) Suez Canal blockage, closure, or restriction (including but not limited to grounding incidents, security closures, or maintenance shutdowns exceeding forty-eight (48) hours);

(ii) closure of the Port of Fos-sur-Mer or the Fos Cavaou LNG Terminal due to weather, labor action, equipment failure, or regulatory order;

(iii) major failure of the Seller's liquefaction facilities at Ras Laffan not caused by inadequate maintenance;

(iv) closure of the Port of Ras Laffan;

(v) failure of the French gas transmission network (operated by GRTgaz or Terega) preventing gas offtake from the Delivery Terminal.

(d) Labor Events:

(i) general or industry-wide strike, lockout, or labor action (not limited to the workforce of either Party or its contractors).

10.3 EXCLUSIONS

The following shall not constitute Force Majeure:

- (a) changes in market prices, currency fluctuations, or loss of profit;
- (b) inability to obtain financing;
- (c) failure of a subcontractor or supplier (unless caused by Force Majeure);
- (d) equipment breakdown due to inadequate maintenance or design defect;
- (e) normal weather conditions (including seasonal fog at Fos-sur-Mer);
- (f) changes in law or regulation (which are addressed in Article 12).

10.4 NOTIFICATION

The Affected Party shall notify the other Party within seventy-two (72) hours (three (3) calendar days) of becoming aware of the Force Majeure Event, specifying the nature, expected duration, estimated impact on performance, and the measures being taken to mitigate the effects.

10.5 CONSEQUENCES

(a) The Affected Party shall be relieved from liability for failure or delay in performing its obligations to the extent caused by the Force Majeure Event.

(b) Take-or-Pay and Ship-or-Pay obligations shall be reduced pro rata for the duration of the Force Majeure Event.

(c) The Affected Party shall use all reasonable efforts to mitigate the effects of the Force Majeure Event and to resume performance as soon as practicable.

(d) If a Force Majeure Event continues for more than eighteen (18) consecutive months, either Party may terminate this Agreement by giving one hundred and eighty (180) days' written notice.

ARTICLE 11: CREDIT SUPPORT

11.1 PARENT COMPANY GUARANTEE -- SELLER

(a) The Seller shall procure and deliver to the Buyer, on or before the Effective Date, an unconditional and irrevocable guarantee from QatarEnergy (the "Seller's Parent Guarantee") guaranteeing the full and timely performance by the Seller of all of its obligations under this Agreement.

(b) The Seller's Parent Guarantee shall be in a form reasonably acceptable to the Buyer and shall remain in full force and effect throughout the Term and for a period of twenty-four (24) months thereafter.

(c) QatarEnergy, as guarantor, shall have a minimum long-term credit rating of "AA-" from Standard & Poor's or "Aa3" from Moody's.

11.2 CREDIT SUPPORT -- BUYER

(a) The Buyer shall maintain a minimum long-term credit rating of "BBB" (investment grade) from Standard & Poor's or "Baa2" from Moody's throughout the Term.

(b) If the Buyer's credit rating falls below the minimum threshold specified in Section 11.2(a), the Buyer shall, within thirty (30) Business Days, deliver to the Seller either:

(i) an irrevocable standby letter of credit in an amount equal to three (3) months' estimated LNG purchases (approximately USD 250 million), issued by a bank with a minimum credit rating of "A" from Standard & Poor's; or

(ii) a parent company guarantee from a suitable guarantor acceptable to the Seller.

ARTICLE 12: CHANGE OF LAW AND REGULATORY COMPLIANCE

12.1 EU REGULATORY COMPLIANCE

(a) The Buyer shall comply with all applicable EU and French laws and regulations relating to the import, regasification, transportation, and sale of natural gas, including without limitation:

(i) Regulation (EU) 2017/1938 concerning measures to safeguard the security of gas supply (the "Gas Security of Supply Regulation");

(ii) Directive 2009/73/EC concerning common rules for the internal market in natural gas (the "EU Gas Directive"), as amended by Directive (EU) 2019/692;

(iii) the EU Energy Efficiency Directive (Directive 2012/27/EU, as recast by Directive (EU) 2023/1791);

(iv) the EU Emissions Trading System (EU ETS), as amended by Directive (EU) 2023/959, to the extent applicable to LNG regasification operations;

(v) the French Energy Code (Code de l'énergie);

(vi) regulations governing third-party access to LNG terminals as implemented by the Commission de Regulation de l'Energie (CRE);

(vii) EU sanctions regulations applicable to energy commodities.

(b) The Buyer shall ensure that the Delivery Terminal complies with all applicable technical standards, safety regulations, and environmental requirements under EU and French law.

12.2 THIRD-PARTY ACCESS

(a) The Buyer acknowledges that the Fos Cavaou LNG Terminal is subject to regulated third-party access obligations under French law and EU regulations. The Buyer shall ensure that it maintains sufficient terminal capacity and slot allocations to receive all Cargoes scheduled under the Annual Delivery Programme.

(b) If third-party access obligations or regulatory changes result in the Buyer's inability to receive scheduled Cargoes, the Buyer shall bear the costs and risks thereof, including demurrage, and such events shall not relieve the Buyer of its Take-or-Pay obligations.

12.3 CHANGE OF LAW

(a) If any change in Applicable Law after the Execution Date directly and materially increases the cost of performance or reduces the economic benefit to either Party under this Agreement by more than five percent (5%) in any Contract Year, the Affected Party may request a review of the affected commercial terms.

(b) The Parties shall negotiate in good faith to agree on equitable adjustments to restore the Affected Party to the economic position it would have been in but for the change in law.

ARTICLE 13: DISPUTE RESOLUTION

13.1 AMICABLE SETTLEMENT

Any dispute arising out of or in connection with this Agreement shall first be referred to the senior management of each Party (at the level of Executive Vice President or above) for resolution through good faith negotiation. The senior representatives shall meet within thirty (30) days of a written request for amicable settlement and shall endeavor to resolve the dispute within sixty (60) days.

13.2 EXPERT DETERMINATION

Any dispute relating to the quality, quantity, measurement, or pricing of LNG (including the determination of the Fixed Adder under Article 4.4) shall be referred to an independent expert agreed upon by the Parties. If the Parties cannot agree on an expert within thirty (30) days, the expert shall be appointed by the International Centre for Expertise of the International Chamber of Commerce (ICC). The expert's determination shall be final and binding on the Parties.

13.3 ARBITRATION

Any dispute not resolved through amicable settlement or expert determination within one hundred and twenty (120) days of the initial written notice of dispute shall be finally and exclusively resolved by arbitration under the Rules of Arbitration of the International Chamber of Commerce (ICC), with:

- (a) Seat of arbitration: Paris, France;
- (b) Language of arbitration: English;
- (c) Number of arbitrators: Three (3), appointed in accordance with the ICC Rules;
- (d) The arbitral award shall be final and binding and enforceable in any court of competent jurisdiction under the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards (1958).

13.4 GOVERNING LAW

This Agreement shall be governed by and construed in accordance with the substantive laws of England and Wales (without regard to conflict of laws principles), which is chosen as a neutral governing law acceptable to both Parties.

13.5 CONTINUED PERFORMANCE

Pending the final resolution of any dispute, the Parties shall continue to perform their respective obligations under this Agreement.

ARTICLE 14: INDEMNIFICATION AND LIABILITY

14.1 MUTUAL INDEMNITY

Each Party shall indemnify, defend, and hold harmless the other Party and its Affiliates, directors, officers, employees, and agents from and against all claims, losses, damages, liabilities, costs, and expenses arising from:

- (a) any breach of the Indemnifying Party's obligations under this Agreement;
- (b) the negligence or willful misconduct of the Indemnifying Party;
- (c) any violation of Applicable Law by the Indemnifying Party;
- (d) any pollution, contamination, or environmental damage caused by or attributable to the Indemnifying Party's operations.

14.2 LIMITATION OF LIABILITY

(a) Neither Party shall be liable for indirect, incidental, special, consequential, or punitive damages, including loss of profit, loss of use, or business interruption, except to the extent arising from fraud or willful misconduct.

(b) The aggregate liability of either Party under this Agreement shall not exceed the total Contract Price payable for the ACQ for three (3) Contract Years.

ARTICLE 15: INSURANCE

15.1 SELLER'S INSURANCE

The Seller shall maintain:

- (a) marine cargo insurance covering the full CIF value of each Cargo during transit from the Loading Port to the Delivery Point;
- (b) P&I (Protection and Indemnity) insurance for each LNG Carrier, with coverage not less than USD 1 billion per vessel;
- (c) hull and machinery insurance for each LNG Carrier at full market value;
- (d) pollution liability insurance with a minimum limit of USD 500 million per incident.

15.2 BUYER'S INSURANCE

The Buyer shall maintain:

- (a) property insurance for the Delivery Terminal;
- (b) third-party liability insurance with a minimum limit of USD 250 million;

(c) business interruption insurance covering at least twelve (12) months of lost throughput revenue.

ARTICLE 16: CONFIDENTIALITY

16.1 OBLIGATIONS

Each Party shall keep confidential the terms and conditions of this Agreement and all information exchanged between the Parties in connection herewith ("Confidential Information"), except as required by Applicable Law, stock exchange rules, or regulatory requirements.

16.2 PERMITTED DISCLOSURES

Confidential Information may be disclosed to: (a) Affiliates; (b) directors, officers, employees, agents, and advisors on a need-to-know basis; (c) lenders and potential lenders; (d) potential assignees or transferees; (e) Governmental Authorities and regulators; and (f) auditors and accountants, in each case subject to customary confidentiality undertakings.

16.3 SURVIVAL

Confidentiality obligations shall survive the expiration or termination of this Agreement for a period of five (5) years.

ARTICLE 17: ASSIGNMENT

17.1 RESTRICTION

Neither Party may assign, transfer, or novate its rights or obligations under this Agreement without the prior written consent of the other Party, which consent shall not be unreasonably withheld.

17.2 PERMITTED ASSIGNMENTS

(a) Either Party may assign this Agreement to an Affiliate, provided that the assignor remains jointly and severally liable or the Parent Company

Guarantee covers the assignee.

(b) The Seller may assign its receivables under this Agreement to lenders as security for project financing.

ARTICLE 18: MISCELLANEOUS

18.1 ENTIRE AGREEMENT

This Agreement, together with all Schedules and Annexes, constitutes the entire agreement between the Parties and supersedes all prior negotiations, understandings, and agreements.

18.2 AMENDMENTS

No amendment shall be effective unless made in writing and signed by both Parties.

18.3 WAIVER

No waiver of any provision shall constitute a continuing waiver or a waiver of any other provision.

18.4 SEVERABILITY

If any provision is held invalid, the remaining provisions shall continue in full force and effect.

18.5 COUNTERPARTS

This Agreement may be executed in counterparts.

18.6 ANTI-CORRUPTION

Each Party represents and warrants that it has not and will not make any payment or give anything of value, directly or indirectly, to any government official or any other person for the purpose of obtaining or retaining business or securing any improper advantage, in violation of the United

Kingdom Bribery Act 2010, the United States Foreign Corrupt Practices Act, the French Sapin II Law (Law No. 2016-1691), or any other applicable anti-corruption law.

18.7 SANCTIONS COMPLIANCE

Each Party represents and warrants that it is not, and will not during the Term become, a Sanctioned Person, and will not knowingly engage in any transaction or activity that would cause the other Party to violate applicable sanctions laws. "Sanctioned Person" means any person or entity listed on any sanctions list maintained by the United Nations, European Union, United States (OFAC), United Kingdom, or the State of Qatar.

SCHEDULE 1: DELIVERY TERMINAL SPECIFICATIONS

Terminal Name: Fos Cavaou LNG Terminal
Location: Port de Fos-sur-Mer, Bouches-du-Rhone, France
Coordinates: 43.4028 degrees N, 4.8928 degrees E
Operator: Fosmax LNG (subsidiary of Elengy)
Terminal Capacity: 8.25 bcm/year (regasification)
Storage Capacity: 3 x 110,000 m3 full-containment LNG tanks (total 330,000 m3)
Number of Berths: 1 main unloading berth, 1 loading berth
Maximum Vessel Size: Q-Max (266,000 m3)
Unloading Rate: 12,000 m3/hour (nominal)
Unloading Duration: Approximately 22-24 hours for a Q-Max Cargo
Unloading Arms: 4 x 16-inch liquid arms, 1 x 16-inch vapor return arm
Minimum Water Depth at Berth: 14.5 meters (chart datum)
Boil-Off Gas Handling: BOG compressors + reliquefaction unit
Send-Out Connections: Connected to GRTgaz transmission network at 80 bar
LNG Truck Loading: Available (2 bays)
Commissioning Year: 2010
Regulatory Authority: Commission de Regulation de l'Energie (CRE)

SCHEDULE 2: LOADING PORT SPECIFICATIONS

Loading Port: Ras Laffan Industrial City LNG Port
Location: Ras Laffan, State of Qatar
Coordinates: 25.9167 degrees N, 51.5333 degrees E
Port Operator: Qatargas / QatarEnergy

Loading Jetties: Multiple jetties for Q-Flex and Q-Max carriers
 Loading Rate: 14,000 m3/hour (nominal)
 Loading Duration: Approximately 19-21 hours for a Q-Max Cargo
 Loading Arms: 4 x 16-inch liquid arms, 1 x vapor return arm
 Minimum Water Depth: 14.0 meters (chart datum)
 Pilotage: Compulsory
 Tidal Range: 1.8 m (mean spring)

SCHEDULE 3: VOYAGE ROUTE

Primary Route: Ras Laffan -- Strait of Hormuz -- Gulf of Oman -- Arabian Sea
 -- Gulf of Aden -- Bab-el-Mandeb Strait -- Red Sea -- Suez Canal --
 Mediterranean Sea -- Fos-sur-Mer

Total Voyage Distance: Approximately 6,200 nautical miles (via Suez Canal)
 Estimated Voyage Duration: 12-14 days (at 19 knots service speed)
 Suez Canal Transit Time: Approximately 12-16 hours
 Boil-Off Rate (voyage): 0.10-0.15% of cargo volume per day
 Estimated Fuel (BOG) Consumption: 700-1,000 tonnes per voyage

Alternative Route (if Suez Canal unavailable):
 Ras Laffan -- Strait of Hormuz -- Arabian Sea -- around Cape of
 Good Hope -- Atlantic Ocean -- Strait of Gibraltar -- Mediterranean
 Sea -- Fos-sur-Mer
 Total Distance (alternative): Approximately 11,500 nautical miles
 Estimated Voyage Duration (alternative): 22-28 days

SCHEDULE 4: ANNUAL CONTRACT QUANTITY BY YEAR

Contract Calendar ACQ Minimum TOP Number of
 Year Year (tonnes) (85% of ACQ) Cargoes (est.)

1	2024	2,000,000	1,700,000 36
2	2025	2,500,000	2,125,000 45
3	2026	3,000,000	2,550,000 54
4	2027	3,000,000	2,550,000 54
5	2028	3,000,000	2,550,000 54
6	2029	3,000,000	2,550,000 54
7	2030	3,000,000	2,550,000 54
8	2031	3,000,000	2,550,000 54

9	2032	3,000,000	2,550,000	54
10	2033	3,000,000	2,550,000	54
11	2034	3,000,000	2,550,000	54
12	2035	3,000,000	2,550,000	54
13	2036	3,000,000	2,550,000	54
14	2037	3,000,000	2,550,000	54
15	2038	3,000,000	2,550,000	54
16	2039	3,000,000	2,550,000	54
17	2040	3,000,000	2,550,000	54
18	2041	3,000,000	2,550,000	54
19	2042	3,000,000	2,550,000	54
20	2043	3,000,000	2,550,000	54

Total Contract Quantity over 20-year Term: 57,500,000 tonnes

SCHEDULE 5: INDICATIVE PRICING EXAMPLES

The following examples illustrate the Contract Price calculation under various Henry Hub price scenarios:

Scenario 1: Low HH Price

HH = USD 2.50/MMBtu

S (Fixed Adder) = USD 3.50/MMBtu

F (Shipping) = USD 1.80/MMBtu

Contract Price = 2.50 + 3.50 + 1.80 = USD 7.80/MMBtu

Approx. price per tonne = 7.80 x 48.7 MMBtu/tonne = USD 379.86/tonne

Scenario 2: Medium HH Price

HH = USD 3.50/MMBtu

S (Fixed Adder) = USD 3.50/MMBtu

F (Shipping) = USD 1.80/MMBtu

Contract Price = 3.50 + 3.50 + 1.80 = USD 8.80/MMBtu

Approx. price per tonne = 8.80 x 48.7 MMBtu/tonne = USD 428.56/tonne

Scenario 3: High HH Price

HH = USD 5.00/MMBtu

S (Fixed Adder) = USD 3.50/MMBtu

F (Shipping) = USD 2.20/MMBtu

Contract Price = 5.00 + 3.50 + 2.20 = USD 10.70/MMBtu

Approx. price per tonne = 10.70 x 48.7 MMBtu/tonne = USD 521.09/tonne

Note: The conversion factor of approximately 48.7 MMBtu per tonne is based

on a typical Qatari LNG composition with a GCV of approximately 1,100 BTU/scf. The actual conversion factor will be determined for each Cargo based on the measured compositional analysis.

SCHEDULE 6: FORM OF PARENT COMPANY GUARANTEE

UNCONDITIONAL AND IRREVOCABLE GUARANTEE

Date: [_____]

Guarantor: QatarEnergy (formerly Qatar Petroleum)
P.O. Box 3212, Doha, State of Qatar

Guaranteed Party: Qatargas Operating Company Limited (the "Seller")

Beneficiary: ENGIE SA (the "Buyer")

QatarEnergy (the "Guarantor") hereby unconditionally and irrevocably guarantees to the Buyer the full, complete, and timely performance by the Seller of all of its obligations under the Long-Term LNG Sale and Purchase Agreement dated November 15, 2023, between the Seller and the Buyer (the "Agreement"), including without limitation:

- (a) the Seller's obligation to make available and deliver LNG in accordance with the ACQ and the Annual Delivery Programme;
- (b) the Seller's obligation to deliver LNG conforming to the Quality Specifications;
- (c) the Seller's Ship-or-Pay obligations;
- (d) the Seller's indemnification obligations; and
- (e) all other obligations of the Seller under the Agreement.

The Guarantor's obligations under this Guarantee are primary and unconditional. The Buyer shall not be required to proceed against the Seller, exhaust any remedy against the Seller, or take any other action before making a demand under this Guarantee.

The Guarantor shall pay to the Buyer, on demand, any amount that the Seller fails to pay when due under the Agreement, within fifteen (15) Business Days of the Buyer's written demand specifying the nature and amount of the Seller's default.

This Guarantee shall not be discharged or affected by: (a) any amendment

or variation of the Agreement (whether or not consented to by the Guarantor); (b) any waiver or forbearance granted by the Buyer to the Seller; (c) any change in the constitution, name, or ownership of the Seller; (d) any insolvency, liquidation, or dissolution of the Seller; or (e) any other circumstance that might otherwise discharge the Guarantor.

This Guarantee shall remain in full force and effect for the duration of the Term of the Agreement and for a period of twenty-four (24) months thereafter.

This Guarantee shall be governed by and construed in accordance with the laws of England and Wales.
