

POWER PURCHASE AGREEMENT (VIRTUAL / FINANCIAL)

NORDIC WIND PORTFOLIO 2025

CONTRACT NO. NWP-2025-0417

DATE OF EXECUTION: 15 April 2025

BETWEEN:

(1) NORDVIND RENEWABLES AB, a limited liability company organized under the laws of the Kingdom of Sweden, with registered office at Vasagatan 12, SE-111 20 Stockholm, Sweden, registered with the Swedish Companies Registration Office (Bolagsverket) under no. 559384-2201 (hereinafter referred to as the "Seller"); and

(2) DATACENTER NORDIC OY, a limited liability company organized under the laws of the Republic of Finland, with registered office at Keilaniementie 1, FI-02150 Espoo, Finland, registered with the Finnish Trade Register under business ID 3217854-6 (hereinafter referred to as the "Buyer").

The Seller and the Buyer are hereinafter individually referred to as a "Party" and collectively as the "Parties".

RECITALS

WHEREAS the Seller is developing and will own and operate a portfolio of three (3) onshore wind farms located across Sweden and Finland with a combined nameplate capacity of 420 MW (the "Facilities"), consisting of:

(a) Lapland Wind Farm (180 MW), located in Jokkmokk Municipality, Norrbotten County, Sweden ("Facility A");

(b) Vasterbotten Wind Farm (140 MW), located in Skelleftea Municipality, Vasterbotten County, Sweden ("Facility B"); and

(c) Ostrobothnia Wind Farm (100 MW), located in Vaasa sub-region, Ostrobothnia, Finland ("Facility C");

WHEREAS the Buyer desires to procure renewable electricity on a virtual (financial settlement) basis to match its Nordic data center electricity consumption with renewable generation, supporting the Buyer's corporate sustainability commitments and RE100 membership obligations;

WHEREAS the Parties wish to enter into this Power Purchase Agreement (the

"Agreement") setting out the terms under which the Seller shall sell and the Buyer shall purchase the Contracted Output and associated Environmental Attributes from the Facilities;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained, the Parties agree as follows:

ARTICLE 1: DEFINITIONS AND INTERPRETATION

1.1 In this Agreement, unless the context otherwise requires, the following terms shall have the meanings ascribed to them below:

"AIB" means the Association of Issuing Bodies, the European hub for Guarantee of Origin registries.

"Annual Delivery Guarantee" has the meaning set forth in Rule VT-2 (Article 9.3).

"Balancing Responsible Party" or "BRP" means the entity designated under Rule ED-3 (Article 5.4) to bear imbalance settlement obligations.

"Base Price" means EUR 32.00 per MWh, as specified in Rule PM-1 (Article 8.1).

"Buyer Shortfall Payment" has the meaning set forth in Rule PY-3 (Article 7.4).

"Cap Price" means EUR 55.00 per MWh, as specified in Rule PM-1 (Article 8.1).

"Certificate Delivery Date" has the meaning set forth in Rule CD-2 (Article 6.3).

"Commercial Operation Date" or "COD" means the date on which each Facility achieves Commercial Operation, as defined in Rule EV-1 (Article 10.1).

"Contracted Output" means the net electrical energy produced by the Facilities and delivered to the relevant Grid Delivery Point, measured on an hourly basis pursuant to Rule VT-1 (Article 9.1).

"Environmental Attributes" means all Guarantees of Origin and other renewable energy certificates associated with the Contracted Output, as further described in Rule CD-1 (Article 6.1).

"Force Majeure Event" has the meaning set forth in Rule EV-4 (Article 10.5).

"GoO" means a Guarantee of Origin issued pursuant to Directive (EU) 2018/2001 (recast Renewable Energy Directive).

"Grid Delivery Point" means the point of interconnection between each Facility and the transmission system, as specified in Schedule A.

"Measurement Period" means one (1) calendar hour, from HH:00 to HH:59, as the basis of settlement under Rule VT-1 (Article 9.1).

"Minimum Annual Delivery" has the meaning given in Rule VT-2 (Article 9.3).

"Nord Pool System Price" means the day-ahead system price published by Nord Pool AS for the relevant bidding zone and settlement hour, used as the Reference Price under Rule PM-2 (Article 8.2).

"P50 Estimate" means the median annual energy production estimate for each Facility as set forth in Schedule B, determined by an Independent Engineer.

"Price Reset" has the meaning set forth in Rule EV-3 (Article 10.4).

"Reference Price" has the meaning set forth in Rule PM-2 (Article 8.2).

"Settlement Amount" has the meaning set forth in Rule PY-1 (Article 7.1).

"Settlement Period" means each calendar month during the Term.

"Term" has the meaning set forth in Article 2.1.

"Upside Share" has the meaning given in Rule PM-3 (Article 8.3).

1.2 References to an "Article" or "Rule" are to articles and rules of this Agreement. References to a "Schedule" are to the schedules attached hereto and forming an integral part of this Agreement.

ARTICLE 2: TERM AND CONDITIONS PRECEDENT

2.1 This Agreement shall become effective on the date of execution (the "Effective Date") and shall remain in force for a period of twelve (12) years from the latest COD among Facilities A, B, and C (the "Term"),

subject to earlier termination in accordance with Rule EV-5 (Article 10.6).

2.2 The obligation to deliver and purchase Contracted Output under this Agreement is conditional upon achievement of COD for each Facility, as defined in Rule EV-1 (Article 10.1). Each Facility shall commence delivery independently upon its respective COD.

2.3 If any Facility fails to achieve COD within twenty-four (24) months of the Effective Date (the "Longstop Date"), the Buyer may, at its sole option, (a) extend the Longstop Date by up to twelve (12) months, or (b) reduce the Contracted Capacity by excluding the non-operational Facility, with a corresponding adjustment to the Annual Delivery Guarantee under Rule VT-2 (Article 9.3) and the Settlement Amount calculation under Rule PY-1 (Article 7.1).

ARTICLE 3: REPRESENTATIONS AND WARRANTIES

3.1 Each Party represents and warrants to the other that: (a) it is duly organized and validly existing under the laws of its jurisdiction of incorporation; (b) it has full power and authority to enter into and perform its obligations under this Agreement; (c) this Agreement has been duly authorized and constitutes a valid and binding obligation; and (d) the execution and performance of this Agreement does not conflict with any law, regulation, or contractual obligation binding upon it.

3.2 The Seller additionally represents and warrants that: (a) it holds or will hold all necessary permits and authorizations for the construction and operation of the Facilities; (b) the Facilities will qualify for GoO issuance under applicable EU and national legislation; (c) the Environmental Attributes have not been and will not be sold, transferred, or retired for the benefit of any third party, pursuant to the exclusivity obligations in Rule CD-1 (Article 6.1).

3.3 The Buyer represents and warrants that it has the financial capacity to perform its payment obligations under Rule PY-1 (Article 7.1) through Rule PY-4 (Article 7.5) for the duration of the Term.

ARTICLE 4: OVERVIEW AND STRUCTURE

4.1 RULE OV-1 (Agreement Structure): This Agreement is a virtual (financial) power purchase agreement under which no physical delivery of electricity occurs between the Parties. The Seller shall sell the Contracted Output into the Nord Pool day-ahead market (Elspot) and, where applicable, the intraday market (Elbas). Financial settlement between the Parties shall be calculated as the difference between the Contract Price determined under Rule PM-1 (Article 8.1) and the Reference Price determined under Rule PM-2 (Article 8.2), applied to the Contracted Output measured under Rule VT-1 (Article 9.1), and settled in accordance with Rule PY-1 (Article 7.1).

Linked Rules: PM-1, PM-2, VT-1, PY-1.

4.2 RULE OV-2 (Portfolio Aggregation): The Contracted Output from all three Facilities shall be aggregated for the purposes of financial settlement under Rule PY-1 (Article 7.1) and the Annual Delivery Guarantee under Rule VT-2 (Article 9.3). However, GoO delivery under Rule CD-1 (Article 6.1) and balancing responsibility under Rule ED-3 (Article 5.4) shall be tracked on a per-Facility basis. In the event of partial portfolio operation (e.g., pre-COD for one Facility), settlement under Rule PY-1 shall apply only to operating Facilities, and the Minimum Annual Delivery under Rule VT-2 shall be pro-rated accordingly.

Linked Rules: PY-1, VT-2, CD-1, ED-3, EV-1.

4.3 RULE OV-3 (Regulatory Framework): This Agreement is governed by and shall be interpreted in accordance with the electricity market regulations of the Kingdom of Sweden and the Republic of Finland, the EU Renewable Energy Directive (2018/2001), and Nord Pool's applicable trading rules. Regulatory changes affecting the pricing mechanism under Rule PM-1 (Article 8.1) or the GoO regime under Rule CD-1 (Article 6.1) shall be addressed through the regulatory change provisions of Rule EV-6 (Article 10.7).

Linked Rules: PM-1, CD-1, EV-6.

ARTICLE 5: ELECTRICITY DELIVERY

5.1 RULE ED-1 (Delivery Obligation): The Seller shall cause each Facility to generate and deliver electricity to the relevant Grid Delivery Point on a continuous basis, subject only to (a) scheduled maintenance notified under Rule ED-4 (Article 5.5), (b) Force Majeure Events under Rule EV-4

(Article 10.5), and (c) curtailment events under Rule ED-2 (Article 5.3). The Seller shall operate each Facility in accordance with Good Utility Practice and shall not voluntarily curtail production except as permitted under Rule ED-2 (Article 5.3).

Linked Rules: ED-2, ED-4, EV-4, VT-1.

5.2 RULE ED-2 (Grid Curtailment and Dispatch): Where a transmission system operator (Svenska Kraftnat or Fingrid) issues a curtailment instruction, the Seller shall comply with such instruction and the curtailed volumes shall be excluded from the Contracted Output for purposes of settlement under Rule PY-1 (Article 7.1). Curtailed volumes shall, however, count toward the Minimum Annual Delivery calculation under Rule VT-2 (Article 9.3) at the deemed production rate determined by the average output of the affected Facility during the four (4) hours immediately preceding the curtailment event, provided that the Seller can demonstrate the curtailment was not caused by the Seller's own acts or omissions.

Linked Rules: PY-1, VT-2, ED-1.

5.3 RULE ED-3 (Balancing Responsibility): The Seller shall act as or procure a Balancing Responsible Party for each Facility and shall bear all costs associated with imbalance settlement in the relevant bidding zone (SE1, SE2, SE3, or FI). The Seller shall submit production forecasts to the relevant BRP no later than 12:00 CET D-1 for day-ahead nomination and shall use commercially reasonable efforts to update intraday positions via Elbas. All balancing costs and revenues shall be for the Seller's sole account and shall not affect the Settlement Amount under Rule PY-1 (Article 7.1) or the Contract Price under Rule PM-1 (Article 8.1).

Linked Rules: PY-1, PM-1, ED-1, VT-3.

5.4 RULE ED-4 (Scheduled Maintenance): The Seller shall provide the Buyer with a rolling twelve (12) month maintenance schedule, updated quarterly, and shall provide no less than thirty (30) days' prior written notice of any scheduled maintenance expected to reduce output by more than 20% of nameplate capacity for any individual Facility. Scheduled maintenance shall be planned outside the peak wind season (October through March) to the extent commercially practicable. During scheduled maintenance, the Seller's delivery obligation under Rule ED-1 (Article 5.1) shall be suspended for the affected Facility, and maintenance hours shall be excluded from the capacity factor calculation under Rule VT-3 (Article 9.4).

Linked Rules: ED-1, VT-3, VT-2.

5.5 RULE ED-5 (Metering and Data): Net generation at each Grid Delivery Point shall be measured by revenue-grade metering equipment compliant with IEC 62053-22 Class 0.5S accuracy standards. Hourly meter data shall be transmitted electronically to both Parties and the settlement agent no later than 5 business days after the end of each Settlement Period. Metered data constitutes the basis for the Contracted Output under Rule VT-1 (Article 9.1) and the hourly settlement calculation under Rule PY-1 (Article 7.1). Any metering discrepancy exceeding 0.5% shall be resolved pursuant to the dispute resolution procedures in Article 12.

Linked Rules: VT-1, PY-1, VT-3.

ARTICLE 6: CERTIFICATE DELIVERY

6.1 RULE CD-1 (GoO Delivery Obligation): The Seller shall transfer to the Buyer Guarantees of Origin corresponding to 100% of the Contracted Output for each Settlement Period, via the AIB registry system (specifically, the Swedish Cesar registry for Facilities A and B and the Finnish Grexel registry for Facility C). GoOs shall identify the technology (onshore wind), the specific Facility, and the production period in accordance with the European Energy Certificate System (EECS) Rules. The Seller warrants that all GoOs are genuine, first-transfer, and have not been used for any other disclosure or compliance purpose, as represented in Article 3.2.

Linked Rules: VT-1, OV-2, CD-2, CD-3.

6.2 RULE CD-2 (Delivery Schedule): GoOs shall be delivered quarterly, no later than forty-five (45) days after the end of each calendar quarter (each such deadline, a "Certificate Delivery Date"). Delivery shall be deemed complete upon the GoOs being credited to the Buyer's designated account in the relevant AIB registry. Quarterly bundling means that GoOs for January-March production are delivered by 15 May, April-June by 15 August, July-September by 15 November, and October-December by 15 February of the following year. Late delivery shall incur the penalty specified in Rule PY-4 (Article 7.5).

Linked Rules: CD-1, PY-4, VT-1.

6.3 RULE CD-3 (Certificate Shortfall): If the Seller is unable to deliver

GoOs corresponding to the full Contracted Output for any quarter, the Seller shall, at its own cost, procure replacement GoOs of equivalent technology (onshore wind) and vintage (same calendar year) from Nordic bidding zones (NO, SE, FI, DK) within thirty (30) days of the applicable Certificate Delivery Date. If replacement GoOs cannot be sourced, the Seller shall pay the Buyer a certificate shortfall payment equal to the volume of undelivered GoOs multiplied by the average GoO market price published by ECOHZ or Commerç for the relevant vintage and technology, plus a 15% premium. This shortfall payment is in addition to, and not in lieu of, any delivery shortfall payments under Rule PY-3 (Article 7.4).

Linked Rules: CD-1, CD-2, PY-3, PY-4, VT-2.

ARTICLE 7: PAYMENT AND SETTLEMENT

7.1 RULE PY-1 (Settlement Calculation): For each Measurement Period (h) during a Settlement Period, the Settlement Amount shall be calculated as follows:

Settlement Amount(h) = Contracted Output(h) x (Contract Price(h)
- Reference Price(h))

where:

- Contracted Output(h) is the metered net generation in MWh for hour (h) as determined under Rule VT-1 (Article 9.1) and verified under Rule ED-5 (Article 5.6);
- Contract Price(h) is the price applicable for hour (h) as determined under Rule PM-1 (Article 8.1) and Rule PM-3 (Article 8.3);
- Reference Price(h) is the Nord Pool System Price for the relevant bidding zone and hour (h) as determined under Rule PM-2 (Article 8.2).

If the Settlement Amount is positive, the Buyer shall pay the Seller. If negative, the Seller shall pay the Buyer. The aggregate monthly Settlement Amount is the sum of all hourly Settlement Amounts for the Settlement Period.

Linked Rules: VT-1, ED-5, PM-1, PM-2, PM-3.

7.2 RULE PY-2 (Invoicing and Payment Terms): The Seller shall issue an invoice to the Buyer within ten (10) business days after receipt of final metered data for each Settlement Period. Each invoice shall contain a detailed hourly breakdown of Contracted Output, Contract Price, Reference Price, and Settlement Amount per Measurement Period. Payment shall be due

within twenty (20) business days of invoice date, by wire transfer to the account specified in Schedule C. Late payment shall bear interest at EURIBOR 3-month plus 2.00% per annum, calculated on a daily basis. Invoicing is dependent on the metering data provision under Rule ED-5 (Article 5.6) and the price publication under Rule PM-2 (Article 8.2).

Linked Rules: PY-1, ED-5, PM-2.

7.3 RULE PY-3 (Delivery Shortfall Payment): If the aggregate Contracted Output for any Contract Year falls below the Minimum Annual Delivery specified in Rule VT-2 (Article 9.3), the Seller shall pay to the Buyer a Delivery Shortfall Payment calculated as:

Shortfall Payment = (Minimum Annual Delivery - Actual Annual Output)
x Base Price x 0.50

where Base Price is as defined in Rule PM-1 (Article 8.1). The Delivery Shortfall Payment shall be invoiced by the Buyer as part of the Annual True-Up under Rule EV-2 (Article 10.3). Volumes excluded due to Force Majeure under Rule EV-4 (Article 10.5) and grid curtailment deemed under Rule ED-2 (Article 5.3) shall be added back to Actual Annual Output for purposes of this calculation.

Linked Rules: VT-2, PM-1, EV-2, EV-4, ED-2.

7.4 RULE PY-4 (Certificate Delivery Penalty): If the Seller fails to deliver GoOs by the Certificate Delivery Date specified in Rule CD-2 (Article 6.3), the Seller shall pay a late delivery penalty of EUR 0.50 per MWh per week of delay (or part thereof), applied to the volume of GoOs not yet delivered. This penalty shall accrue from the Certificate Delivery Date until the earlier of (a) actual delivery or (b) the date on which the certificate shortfall payment under Rule CD-3 (Article 6.4) becomes payable. The penalty under this Rule PY-4 is separate from and in addition to the shortfall payment under Rule CD-3.

Linked Rules: CD-2, CD-3, CD-1, PY-2.

7.5 RULE PY-5 (Security and Credit Support): The Seller shall maintain, for the duration of the Term, a performance bond or letter of credit in the amount of EUR 5,000,000, issued by a financial institution with a minimum credit rating of A- (S&P) or equivalent. The Buyer may draw upon such security in the event of (a) non-payment of any Settlement Amount due under Rule PY-1 (Article 7.1) exceeding thirty (30) days past due, (b) non-delivery of GoOs exceeding ninety (90) days past the Certificate

Delivery Date under Rule CD-2 (Article 6.3), or (c) Seller Event of Default under Rule EV-5 (Article 10.6).

Linked Rules: PY-1, CD-2, EV-5.

ARTICLE 8: PRICE INDEXATION AND MARKET DATA

8.1 RULE PM-1 (Contract Price - Hybrid Floor): The Contract Price for each Measurement Period shall be no less than the Base Price of EUR 32.00 per MWh (the "Floor Price"). The Floor Price shall be adjusted annually on each anniversary of the first COD by the Harmonized Index of Consumer Prices (HICP) for the Euro Area as published by Eurostat, applied on a cumulative compounding basis from the Effective Date. The Floor Price constitutes the minimum payment obligation and interacts with the upside sharing mechanism defined in Rule PM-3 (Article 8.3) and the settlement calculation in Rule PY-1 (Article 7.1).

Linked Rules: PM-3, PY-1, PY-3, EV-3.

8.2 RULE PM-2 (Reference Price): The Reference Price for each Measurement Period shall be the Nord Pool day-ahead system price for the bidding zone in which the relevant Facility is located (SE1 for Facility A, SE2 for Facility B, FI for Facility C), as published by Nord Pool AS on its official platform (www.nordpoolgroup.com) by 14:00 CET D+1. Where Facilities span multiple bidding zones, the Reference Price for portfolio settlement under Rule PY-1 (Article 7.1) shall be the production-weighted average of the applicable zone prices, weighted by metered output per Facility per Measurement Period as reported under Rule VT-1 (Article 9.1).

Linked Rules: PY-1, VT-1, PM-1, ED-3.

8.3 RULE PM-3 (Upside Sharing Mechanism): When the Reference Price for any Measurement Period exceeds the Cap Price of EUR 55.00 per MWh, the Contract Price for that hour shall be calculated as:

$$\text{Contract Price}(h) = \text{Floor Price} + 0.40 \times (\text{Reference Price}(h) - \text{Cap Price})$$

The Buyer's Upside Share is forty percent (40%) of the margin above the Cap Price. When the Reference Price is between the Floor Price and the Cap Price, the Contract Price equals the Floor Price (i.e., the Buyer

benefits from the entire spread). When the Reference Price is below the Floor Price, the Contract Price remains at the Floor Price (i.e., the Seller receives a top-up payment from the Buyer equal to the difference, as calculated under Rule PY-1 (Article 7.1)). This tiered structure ensures the Seller always receives at least the Floor Price while sharing supernormal returns with the Buyer, and is subject to reset under Rule EV-3 (Article 10.4).

Linked Rules: PM-1, PM-2, PY-1, EV-3.

8.4 RULE PM-4 (Market Data Fallback): In the event that Nord Pool fails to publish the day-ahead system price for any Measurement Period, the Reference Price shall be determined as follows in order of priority:

(a) the EPEX SPOT Nordic day-ahead price for the equivalent zone and hour; (b) the average of the day-ahead prices published by the two nearest bidding zones for the same hour; (c) the average Reference Price for the same hour across the preceding seven (7) calendar days. If none of the foregoing are available, the Parties shall negotiate in good faith a substitute reference price. Any fallback determination affects the Settlement Amount under Rule PY-1 (Article 7.1) and shall be documented in the monthly settlement report under Rule PY-2 (Article 7.2).

Linked Rules: PM-2, PY-1, PY-2, VT-1.

ARTICLE 9: VOLUME AND TIMESERIES

9.1 RULE VT-1 (Hourly Production Measurement): The Contracted Output for each Measurement Period shall be the net electrical energy (in MWh, to three decimal places) injected at the Grid Delivery Point of each Facility, as recorded by the revenue meters specified in Rule ED-5 (Article 5.6), adjusted for (a) transformer losses between generator terminals and the Grid Delivery Point (estimated at 1.5%), and (b) any parasitic consumption by the Facility's auxiliary systems. Hourly data shall form the basis for settlement under Rule PY-1 (Article 7.1), the Reference Price weighting under Rule PM-2 (Article 8.2), and the GoO volume calculation under Rule CD-1 (Article 6.1).

Linked Rules: ED-5, PY-1, PM-2, CD-1.

9.2 RULE VT-2 (Annual Delivery Guarantee): The Seller guarantees a Minimum Annual Delivery equal to eighty-five percent (85%) of the aggregate P50 Estimate for all operating Facilities (the "Minimum Annual Delivery").

Based on the P50 Estimates in Schedule B, the initial Minimum Annual Delivery is:

Facility A (180 MW): P50 = 540 GWh/yr -> Minimum = 459 GWh/yr

Facility B (140 MW): P50 = 380 GWh/yr -> Minimum = 323 GWh/yr

Facility C (100 MW): P50 = 260 GWh/yr -> Minimum = 221 GWh/yr

Portfolio Total: P50 = 1,180 GWh/yr -> Minimum = 1,003 GWh/yr

Failure to meet the Minimum Annual Delivery triggers the Delivery Shortfall Payment under Rule PY-3 (Article 7.4), subject to the exclusions for Force Majeure under Rule EV-4 (Article 10.5) and grid curtailment under Rule ED-2 (Article 5.3). The Annual Delivery Guarantee shall be reconciled as part of the Annual True-Up under Rule EV-2 (Article 10.3).

Linked Rules: PY-3, EV-4, ED-2, EV-2, VT-1, ED-4.

9.3 RULE VT-3 (Capacity Factor Tracking): The Seller shall report monthly the net capacity factor for each Facility, calculated as:

$$\text{NCF} = \frac{\text{Actual Output}}{(\text{Nameplate Capacity} \times \text{Hours in Period} - \text{Maintenance Hours per Rule ED-4 (Article 5.5)})}$$

If the trailing twelve-month NCF for any Facility falls below 22%, the Buyer may request a Technical Review pursuant to Article 11. The capacity factor is used to assess performance relative to the P50 Estimates underpinning the Annual Delivery Guarantee in Rule VT-2 (Article 9.3) and affects the metering reconciliation under Rule ED-5 (Article 5.6).

Linked Rules: ED-4, VT-2, ED-5, VT-1.

9.4 RULE VT-4 (Production Forecast Provision): The Seller shall provide the Buyer with (a) a rolling 48-hour production forecast updated every 6 hours, (b) a monthly production forecast issued by the 25th of the preceding month, and (c) an annual production forecast issued by 1 December of the preceding year. Forecasts shall be provided at the Facility level and aggregated portfolio level. While forecasts are provided for information purposes only and do not modify the Seller's delivery obligations under Rule ED-1 (Article 5.1), persistent deviation of actuals from forecasts exceeding 30% on a quarterly basis shall trigger a good-faith consultation between the Parties. Forecast data feeds into the balancing nominations under Rule ED-3 (Article 5.4).

Linked Rules: ED-1, ED-3, VT-1, VT-2.

ARTICLE 10: EVENTS

10.1 RULE EV-1 (Commercial Operation Date Milestones): Each Facility shall achieve COD upon satisfaction of all of the following conditions:

(a) completion of grid connection and energization tests; (b) issuance of a Provisional Acceptance Certificate by the EPC contractor; (c) successful completion of a 240-hour reliability test at no less than 95% availability; and (d) receipt of all necessary operating permits. The expected COD dates are: Facility A - Q2 2026, Facility B - Q3 2026, Facility C - Q4 2026.

Upon COD, delivery obligations under Rule ED-1 (Article 5.1) commence and the Contracted Output begins to be measured under Rule VT-1 (Article 9.1) for settlement under Rule PY-1 (Article 7.1).

Linked Rules: ED-1, VT-1, PY-1, OV-2, VT-2.

10.2 RULE EV-2 (Annual True-Up): Within ninety (90) days after the end of each Contract Year, the Parties shall conduct an Annual True-Up reconciliation, which shall include: (a) verification of aggregate Contracted Output against the Minimum Annual Delivery under Rule VT-2 (Article 9.3);

(b) calculation and settlement of any Delivery Shortfall Payment under Rule PY-3 (Article 7.4); (c) reconciliation of GoO deliveries against metered output under Rule CD-1 (Article 6.1); (d) recalculation of the HICP-adjusted Floor Price under Rule PM-1 (Article 8.1) for the forthcoming Contract Year; and (e) review of capacity factor performance under Rule VT-3 (Article 9.4). The True-Up statement shall be binding absent manifest error.

Linked Rules: VT-2, PY-3, CD-1, PM-1, VT-3.

10.3 RULE EV-3 (Five-Year Price Reset): On the fifth (5th) and tenth (10th) anniversaries of the first COD (each a "Reset Date"), either Party may request a review of the Base Price and Cap Price. The reset shall be determined by an independent market consultant appointed by mutual agreement, taking into account: (a) the average Nord Pool system price over the preceding 36 months as published under Rule PM-2 (Article 8.2);

(b) changes in the levelized cost of onshore wind energy; (c) prevailing corporate PPA market pricing in the Nordics. The adjusted Base Price shall not deviate by more than +/-15% from the then-current Base Price, and the Cap Price shall be adjusted proportionally. If the Parties cannot agree on the reset within 120 days of the Reset Date, the existing prices under

Rule PM-1 (Article 8.1) and Rule PM-3 (Article 8.3) shall continue to apply unchanged.

Linked Rules: PM-1, PM-2, PM-3, PY-1.

10.4 RULE EV-4 (Force Majeure): A "Force Majeure Event" means any event beyond the reasonable control of the affected Party, including but not limited to:

(a) grid curtailment ordered by Svenska Kraftnat or Fingrid for system security reasons (distinct from economic curtailment under Rule ED-2 (Article 5.3)); (b) extreme weather conditions where ambient temperature falls below -35 degrees Celsius for more than 48 consecutive hours, causing turbine cold-weather shutdown; (c) natural disasters, war, terrorism, or pandemic; (d) changes in law that make performance illegal.

During a Force Majeure Event, the affected Party's obligations under Rule ED-1 (Article 5.1) and Rule VT-2 (Article 9.3) shall be suspended to the extent affected. Force Majeure volumes are excluded from the Delivery Shortfall calculation under Rule PY-3 (Article 7.4) and shall not count against the Minimum Annual Delivery under Rule VT-2.

Linked Rules: ED-1, ED-2, VT-2, PY-3.

10.5 RULE EV-5 (Termination Triggers): Either Party may terminate this Agreement by written notice upon the occurrence of any of the following:

(a) a material breach by the other Party that remains uncured for sixty (60) days after written notice; (b) insolvency, bankruptcy, or administration of the other Party; (c) failure of any Facility to achieve COD by the Longstop Date (as may be extended under Article 2.3);

(d) aggregate Contracted Output falling below seventy percent (70%) of the Minimum Annual Delivery under Rule VT-2 (Article 9.3) for two (2) consecutive Contract Years, after adjusting for Force Majeure under Rule EV-4 (Article 10.5); (e) non-payment of Settlement Amounts under Rule PY-1 (Article 7.1) exceeding EUR 2,000,000 in aggregate and remaining unpaid for sixty (60) days. Upon termination, the termination payment shall be calculated as the present value of the remaining expected Settlement Amounts for the unexpired Term, discounted at the EUR mid-swap rate plus 1.00%.

Linked Rules: VT-2, EV-4, PY-1, EV-1, PY-5.

10.6 RULE EV-6 (Regulatory Change): If a change in applicable law, regulation, or government policy materially affects the economic balance of this Agreement (including but not limited to changes to the GoO regime, Nordic market design, or the introduction of capacity mechanisms), either Party

may request renegotiation of affected terms within sixty (60) days of the change taking effect. Affected terms include the pricing mechanism under Rule PM-1 (Article 8.1), the certificate delivery framework under Rule CD-1 (Article 6.1), and the balancing responsibilities under Rule ED-3 (Article 5.4). If the Parties cannot reach agreement within one hundred and twenty (120) days, either Party may invoke the dispute resolution mechanism in Article 12 or, if the change renders the Agreement fundamentally uneconomic, terminate under Rule EV-5 (Article 10.6) clause (d).

Linked Rules: PM-1, CD-1, ED-3, EV-5, OV-3.

ARTICLE 11: TECHNICAL REVIEW AND INDEPENDENT ENGINEER

11.1 The Buyer may request a Technical Review of any Facility if the trailing twelve-month NCF falls below the threshold specified in Rule VT-3 (Article 9.4). The Technical Review shall be conducted by an Independent Engineer mutually agreed by the Parties, at the Seller's cost.

11.2 The Independent Engineer may recommend remedial measures, and the Seller shall implement commercially reasonable recommendations within 180 days. Failure to implement material recommendations may constitute a breach relevant to termination under Rule EV-5 (Article 10.6).

ARTICLE 12: DISPUTE RESOLUTION

12.1 Any dispute arising out of or in connection with this Agreement shall be first submitted to senior management of both Parties for resolution within thirty (30) days. If unresolved, the dispute shall be referred to arbitration under the Arbitration Rules of the Arbitration Institute of the Stockholm Chamber of Commerce (SCC). The arbitral tribunal shall consist of three (3) arbitrators. The seat of arbitration shall be Stockholm, Sweden. The language of arbitration shall be English. The arbitral award shall be final and binding.

ARTICLE 13: GOVERNING LAW

13.1 This Agreement shall be governed by and construed in accordance with the substantive laws of the Kingdom of Sweden, without regard to its conflict of laws principles.

ARTICLE 14: MISCELLANEOUS

14.1 Amendments to this Agreement shall be valid only if made in writing and signed by both Parties.

14.2 Neither Party may assign its rights or obligations under this Agreement without the prior written consent of the other Party, except to an Affiliate or in connection with a financing arrangement (provided the assignor remains liable).

14.3 This Agreement constitutes the entire agreement between the Parties with respect to the subject matter hereof and supersedes all prior negotiations, representations, and agreements.

14.4 Notices shall be delivered in writing to the addresses specified in Schedule D, with copies by electronic mail, and shall be deemed received upon confirmed delivery.
